

Sofia Moreno Lopez

+52 55 7560 9203 • sofialopezcontact@gmail.com • <https://github.com/sofia-lpz>
Mexico, Mexico City

Education

Tecnologico de Monterrey
August 2022 - June 2026
BEng Computer Science

- GPA 97%

Academic Talent Scholarship

Languages

Native Spanish Speaker
Proficient English Speaker C2

Technologies & Skills

Languages. Python, C++, C#, JavaScript, Java, TypeScript, MATLAB

Web Development. HTML, CSS, React, Vue, Django, Spring Boot, Node.js, Express.js, REST API Design, Microservices, System Design

AI / ML. PyTorch, TensorFlow, Scikit-learn, LangChain, Machine Learning, Large Language Models, Retrieval Augmented Generation, LLM APIs, Prompt Engineering, Vector Databases

Databases. SQL, MySQL, PostgreSQL, MongoDB

Cloud, DevOps & Tools. AWS (Amplify, SageMaker), Oracle Cloud, Docker, CI/CD, GitHub Actions, Linux, Git, Gitlab, GitHub, GitHub Projects, Tableau, Power BI, Data Pipelines

Testing & Methods. JUnit, Mockito, Selenium, Unit Testing, Agile, Scrum, Kanban, Code Review

Summary

Computer Science Engineer (Tec de Monterrey, GPA 97%) with 2+ years of hands-on experience building AI-powered SaaS products and conducting applied ML research. Specialized in full-stack development and LLM integration, with proven delivery in enterprise environments serving clients such as Grupo Modelo and F1 Mexico Grand Prix. Hackathon winner across MIT, AWS, and FEMSA competitions. Seeking a software engineering role where I can drive impact through scalable systems and intelligent automation.

Experience

Trott systems - Software Engineering Intern
October 2025 - Present

- Automated 3 critical internal workflows via OpenAI API + Javascript, eliminating ~12 hrs/week of manual processing

Bono - Software Engineering Intern
May 2024 - September 2025

- Co-developed a multi-tenant SaaS platform for carbon footprint tracking, serving enterprise clients including Grupo Modelo and F1 Mexico Grand Prix, processing thousands of emissions records monthly
- Fullstack development with Spring Boot, Vue.js and PostgreSQL.

University of Toronto - Academic AI concentration
September 2025 - January 2026

- Completed advanced coursework in computational linguistics and ML, covering POS tagging, RAG architectures, data ethics and statistical methods for AI development at scale

Tecnologico de Monterrey - AI Research Assistant
January 2024 - Present

- Researched novel optimization strategies for gradient flow in deep neural networks, achieving 30% reduction in training convergence time on benchmark datasets

Awards

Emerging Leaders of the Americas Scholarship, September 2025
Hack4Her Arca Continental AI Hackathon Second Place, June 2025
FEMSA Ventures X Hackathon Finalist, May 2025
Bono EcoHack Hackathon Winner, May 2024
MIT HackMX6 Hackathon Winner, October 2024
MIT Policy Hackathon Participant, November 2024
Amazon Web Services HackMX5 Hackathon Second Place, October 2023
